Investigation of map functions implemented  
in existing map support tools

2019-

Meetings with emergency responders

2019-2020

The screenshot displays the Tellus software interface, which is used for managing emergency incidents. The main window shows a map of Oslo with several incident markers. A sidebar on the right contains a list of resources (A21, A22, A042, B21, A04, A620, B06, B20, T04, U05, Y60, Y61, Y60) and a list of incidents (Id 11 - TRAFIKKULYKKE PERS.SKADE, Id 4 - BRANN, Id 4 - SLAGSMÅL, Id 1 - HUSBRÅK, Id 2 - SKADEVERK BY..., Id 3 - BEDRAGERI RE..., Id 5 - TRAFIKKUHJELL, Id 2 - SJØFARTSFOR..., Id 5 - BISTAND NAMS...). The interface also includes a search bar, filters, and a list of resources.

## 1. Functions of Common Situational Picture (CSP) map support

### 1.1. Data display and sharing

- 1.1.1 Layer manager (Temakartvelger)
- 1.1.2 Bookmarks (Bokmerker)
- 1.1.3 Workspace (Arbeidsrom)
- 1.1.4 Playback (Avspilling)
- 1.1.5 Map sharing (Kartdeling)

### 1.2. Data creation

- 1.2.1 Draw (Tegn)
- 1.2.2 Report (Redigere melding)
- 1.2.3 Administrate incident (Administrere hendelse)

### 1.3. Situational analysis

- 1.3.1 Routing (Veibeskrivelse)
- 1.3.2 Layer filtering (Temalagfiltrering)
- 1.3.3 Area analysis (Områdeanalyse)
- 1.3.4 Overview (Oversikt)
- 1.3.5 Comparison (Sammenlikne data)
- 1.3.6 Drift analysis (Drivbaneberegning)

## 2. Functions of Common Operational Picture (COP) map support

### 2.1. Resource management

- 2.1.1 Resource monitoring (Ressursovervåking)
- 2.1.2 Assignment management (Oppdragsledelse)

### 2.2. Operational analysis

- 2.2.1 Proximity analysis (Nærhetsanalyse)
- 2.2.2 Route calculation and driving description (Ruteberegning og kjørebeskrivelse)
- 2.2.3 Response time ranges (Responstidsområder)
- 2.2.4 Driving range (Kjøretidsområde)

### 2.3. Supportive analysis

- 2.3.1 Analysis of human spatial behavior (Adferdsanalyse)
- 2.3.2 Buffer analysis (Bufferanalyse)
- 2.3.3 Viewshed analysis (Frisiktanalyse)

# Functions of map-based tools supporting emergency management

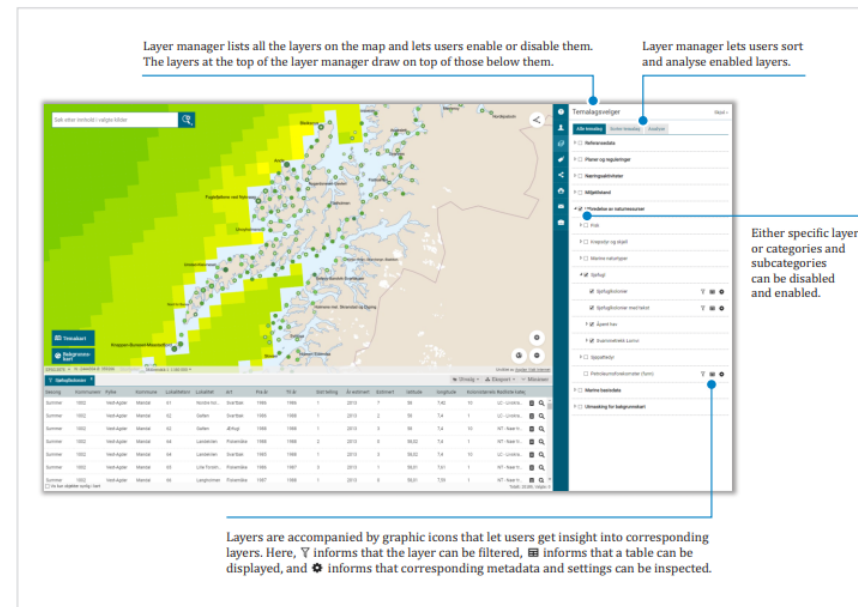

### 1.1.1

## Examples of use

Kystinfo	<a href="https://a3.kystverket.no/kystinfo">https://a3.kystverket.no/kystinfo</a>
Kystinfo Beredskap	<a href="https://beredskap.kystverket.no/">https://beredskap.kystverket.no/</a>
NOFO COP	<a href="https://cop.nofo.no/">https://cop.nofo.no/</a>
DSB Kart	<a href="https://kart.dsb.no/">https://kart.dsb.no/</a>
BarentsWatch Arealverktøyet	<a href="https://kart.barentswatch.no/">https://kart.barentswatch.no/</a>

The layer manager is essential for all map-based tools as it lists all the layers on the map and provides information what the objects in each layer represent and how they can be displayed and analysed. Moreover, the layer manager helps manage the display order of the layers.

BarentsWatch Arealverktøyet  
<https://kart.barentswatch.no/>

Temakartvelger Adaptive (Asplan Viak Internet, 27.06.2018)  
[https://www.youtube.com/watch?v=4f0jrur8LaQ&ab\\_channel=AsplanViakInternet](https://www.youtube.com/watch?v=4f0jrur8LaQ&ab_channel=AsplanViakInternet)

# Bookmarks

1.1.2

Bokmerker

## Examples of use

Kystinfo  
Kystinfo Beredskap  
NOFO COP  
DSB Kart

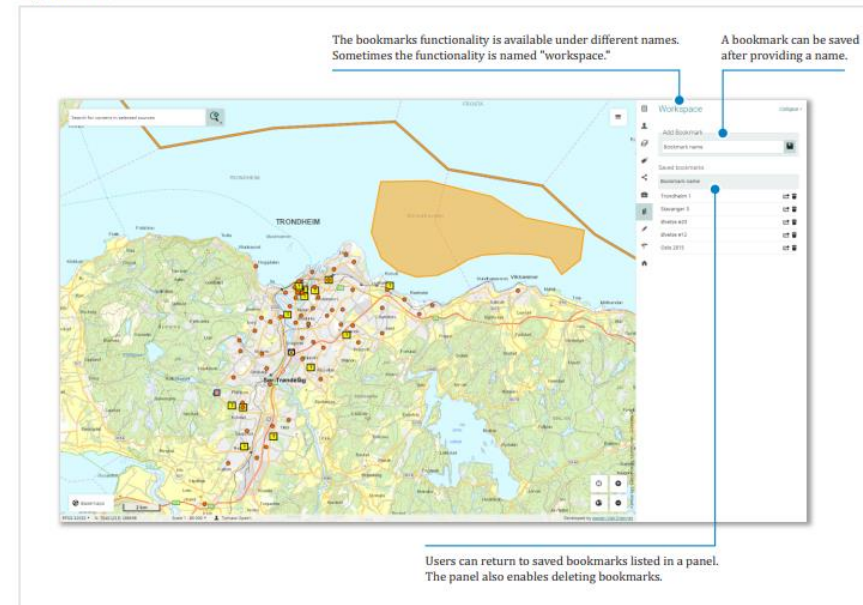

<https://a3.kystverket.no/kystinfo>  
<https://beredskap.kystverket.no/>  
<https://cop.nofo.no/>  
<https://kart.dsb.no/>

## Description

The bookmarks functionality enables users to save a specific map extent and a map configuration that users want as reference later. For example, a user can create a bookmark that identifies an area of an emergency incident. Additionally, the map is configured in a specific way, with a number of enabled layers and created objects. As the user pans and zooms around the map, after saving a bookmark, he or she can easily return to the area by accessing the bookmark. Users can also use bookmarks to highlight areas on maps that they want others to see.

# Workspace

1.1.3

Arbeidsrom

## Examples of use

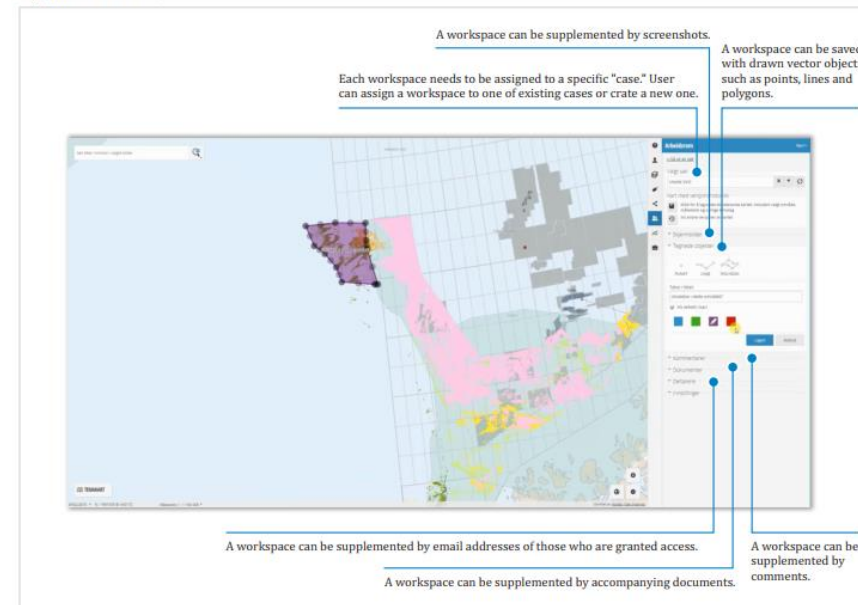

Kystinfo <https://a3.kystverket.no/kystinfo>  
BarentsWatch Arealverktøyet <https://kart.barentswatch.no/>

## Description

"Workspace" extends the functionality provided through "bookmarks." The same as in bookmarks, workspace lets users save a specific map extent and a map configuration that users want as reference later or want others to see. However, the workspace functionality offers more features than bookmarks. Along with the map extent and configuration, users can save accompanying information such as screenshots, drawn objects (points, lines, polygons), comments and extra documents. Moreover, each workspace can be supplemented by a list of email addresses of persons who are to be granted access to the workspace.

## Discussion

- 1 Who should be the target audience of the INSITU inventory?
- 2 Should we propose “need to have” and “nice to have” functions?
- 3 How should the INSITU inventory look like?  
Is a report elaborated as a PDF document sufficient?
